Subject: Recommendation for Tigray Youth Employment Solutions

Tigray Sub-National Health Cluster sincerely acknowledges the valuable contribution of **Tigray Youth Employment Solutions (TYES)** to strengthening health service delivery across Tigray. TYES has demonstrated a strong commitment to humanitarian health response through the provision of emergency health services in Adigrat IDP sites and the implementation of health projects in Shire and Axum towns. The organization has also successfully delivered health interventions across eight woredas in the Southern Zone of Tigray. As an active Health Cluster member, TYES has consistently supported coordinated health responses through its engagement with the Tigray Regional Health Bureau, contributing to improved access to essential health services for vulnerable and crisis-affected populations across Southern, Eastern, and Central Zones of Tigray.

TYES is an active member of the Health Cluster, regularly participating in coordination meetings, reporting through the 4Ws system, and contributing to evidence-based planning and response.

TYES has demonstrated the operational capacity to reach vulnerable and underserved populations, including internally displaced persons (IDPs), through community-based and facility-level interventions. TYES's field presence, and technical expertise, position it well to contribute to addressing critical health service gaps, including support to mobile health and nutrition teams, government health facilities, emergency referrals, healthcare worker capacity strengthening, disease surveillance, health promotion, and the delivery of essential medicines and medical supplies.

The Health Cluster appreciates **Tigray Youth Employment Solutions**'s continued commitment and contribution to strengthening health system and improving access to essential health services for affected and vulnerable populations in Tigray.

Best regards!
Haile Tensay Mahary
